EXCURSIONS AND VISITS

NORCIA

Once in the main square you can visit the Church of San Benedetto, built over the birthplace of the saint. The typical hut-like façade with the large central rose window with the symbols of the four evangelists overlooks the portal embellished with bundles of columns and the sculptural group representing the Madonna and Child between two angels with the statues of saints Benedict and saints on the sides. Scholastica. Inlaid polychrome marbles break the whiteness of the facade. Built on the basis of a Latin cross and a single nave, the original church of 1200 is divided into two floors: the lower one of the crypt where it is possible to observe the remains of the Roman walls, and the upper one of the main church. Leaving the main door and turning left, the ancient "Measures" (14th century) line up under a portico from the 1500s, large stone containers used during markets as a unit of measurement for goods. Remaining in the square you can admire the 13th century Palazzo Comu-nale with Loggia, Staircase and Bell Tower. Inside it is worth visiting the Sala del Consiglio Maggiore, the Sala Sertoriana or the Sala dei Fortanta conservatori della pace and the Cappella dei Priori, an eighteenth-century structure, where the precious reliquary of San Benedetto is kept, one of the last in the Gothic style. The Cathedral of Santa Maria Argentea also has very ancient origins. Built between 1556-1570 in the Renaissance style with large stone arches and noble chapels. The interior preserves numerous works of art, including the fresco in which the Saints Benedict and Scholastica are portrayed with the Madonna and Child in the center, and the Crucifix. The 16th-century fresco depicting St. Nicholas of Tolentino with a dove on his shoulder, the Madonna and Child blessing in the center and St. Augustine dominates the portal of the Church of Sant'Agostino, very similar to that of St. Benedict. Another example of Gothic art, now home to the auditorium, the municipal library and the historical archive, is the Monumental Complex of San Francesco. Among the internal frescoes of the fifteenth and sixteenth centuries it is possible to appreciate the majestic altarpiece with the Coronation of the Virgin by Jacopo Siculo (1541). Excursion with donkeys on the Sibillini Mountains for families and children. A few kilometers from Norcia, still within the Sibillini Mountains National Park, there is a fantastic donkey farm. The donkeys are the ideal companions for the excursions of the little ones. The mule is a very docile animal that particularly loves contact with children, understands their natural sweetness and loves to be pampered and caressed. He is funny and nice, he brings joy to the group, changes the mood of those close to him, aggregates and involves. The as-no does not judge, does not comment, does not wear trendy clothes, does not put on airs, is humble and friendly, but independent and determined. It is a slow and cautious animal that transmits calm, but is also stubborn and tenacious. For the safety of the parents, donkeys do not like to run or jump, but they walk regularly without acceleration. It is possible to take daily walks. Children ride donkeys or load them with their luggage. Soon a direct line is established between the animal and its young rider, a communication that only the little ones are able to establish. Parents, if they wish, can accompany their "great" riders on a wonderful trekking walk.

Rafting along the Nera River

Along the Nera river, aboard a rubber dinghy with a guide-instructor, you will arrive in places that can only be reached by water. The wetsuit, helmets and all equipment are of high quality. The descent is quiet, suitable for families and groups of friends. For those who want a little more thrill, for those who have already sailed and are familiar with the river, we recommend the canoe descent.

Flowering, a unique spectacle

In the months of May and June in Castelluccio it is possible to witness an extraordinary manifestation of nature: flowering. Flowers become the protagonists of the landscape when large expanses of poppies alternate with extensions of daisies, the yellow vetch that infests the fields
